Hi Ksenija,

Thanks for taking the time to help with this. I went through and viewed the pictures for reference, but since I ran out of time and hit my deadline, I already passed the materials on for review.

If I'm asked to include C&D pictures later, this might be something to pursue. If so, I'll circle back to you on this, but for now, let's hold off on asking the facility for permission.

Thanks again, all, for your help on this.

-Drew

I posted the pictures I have on the One Drive and gave you access to the folder. Let me know if you can see them. Again, please see which one(s) you would like to use and I will check if we can have the facility permission, I may need to provide the context when asking for the permission, so the text that would accompany the picture would be useful. Please let me know if you would be comfortable with me sharing that language.

That's right, let me check on that. I remember that we did ask as a courtesy for inside of the facilities like with when we used the pictures for the tires report. Rita mentioned that you had a powerpoint presentation with pictures?

Also, I found the attached on flickr. It is unclear what type of resources recycling facility this is, although looking at some of the materials it may have come from demolition waste.

But we don't have facility permissions either. I can send them forward. (I think there may be quite a few and I am not sure what the best way of transmitting them is, I will look through.) However, again, we do not have facility permissions to use them. The Best practices page has some pictures 2-3, <https://www.epa.gov/smm/best-practices-reducing-reusing-and-recycling-construction-and-demolition-materials>, and there are deconstruction videos on the abandoned mobile home toolkit page, but those are videos.

It doesn't look like our C&D page has any photos (<https://www.epa.gov/smm/sustainable-management-construction-and-demolition-materials>). Drew said that if we send him pictures we took ourselves that he'll help us determine if they're OK to use. I don't think it has to be approved through EPA's database to use it.

Thanks,
Chris

Have they looked at pictures that are on the C&D materials websites to see if anything fits the bill?

Hi Chris,

While I have pictures from several facilities, I don't have anything readily available that is from an EPA approved database of pictures (copyrights and permissions) and I don't know whether the information on which databases we looked at for pictures to post on the website for C&D materials is useful to CSS, since CSS is the source of that information, but...

These are the sources that CSS provided to Susie previously that were EPA approved sources:

- 1.) ORCR's photo gallery: <I:\OSW\RCRA Slides> and <http://intranet.epa.gov/intraosw/communications/comm-services/photos.html>
- 2.) Office of MultiMedia's photo gallery: <http://intranet.epa.gov/media/photogallery/index.htm>
- 3.) Flickr www.flickr.com: search for an image and then use the pull down menu to choose U.S. Government Works so you only find pictures that have no restrictions for use (we can only use these government works).
- 4.) USDA/NASA/Forest Service/DOE photo galleries:
 - <https://photogallery.sc.egov.usda.gov/res/sites/photogallery/>
 - <http://www.ers.usda.gov/newsroom/photos-images.aspx>
 - <https://www.ars.usda.gov/oc/images/image-gallery/>
 - <https://www.nasa.gov/multimedia/imagegallery/index.html>
 - <http://www.fs.fed.us/photovideo/>
 - <http://energy.gov/photos>
 - <http://www.hanford.gov/c.cfm/photogallery>
- 5.) Documerica (historical photos and images) and State of the Environment Photo Project:
 - <https://www.epa.gov/aboutepa/historical-photos-and-images>
 - <https://www.flickr.com/photos/usnationalarchives/collections/72157620729903309/>
 - <https://www.flickr.com/groups/1667216@N23/>

Subject: C&D Pictures

Hi Ksenija,

CSS is in need of some C&D pictures for America Recycles Day. I was told that they are for tweets about keeping C&D out of landfills and using those materials to help rebuild our economy and infrastructure. Do you happen to have anything that might fit that description? I was trying to search for my old pics that we took at Broad Run and they must be on my personal computer.

Here are the posts:

Ex. 5 Deliberative Process (DP)

I'm going to let them know that C&D materials aren't necessarily the largest generated waste stream in the US—mining and oil & gas w/ produced waters is greater.

Thanks,
Chris
